SECTION - B**(Descriptive Type Questions)**

1. Read the following passage carefully and answer the questions that follow :

One of the greatest mysteries of bird life is travelling. Every year during autumn and early winter, birds travel from northern regions of Asia, Europe and America to the southern warmer lands. They make the return journey again during spring and early summer. They are punctual unless they are delayed by bad weather. They face many dangers and hardships while travelling long distance through the air, over hills, forests, plains and large stretches of water. Sometimes sudden storms arise and drive them far out of commerce. Often they are blown right out to sea and are drowned in the wild waves. At night bright lights attract and confuse the birds.

They cannot fly at their fastest. The migration speed is usually from 48 to 64 km an hour and rarely exceeds 80.

Questions :
